

PainWeek®

The Regulatory Agency Will See You Now

Kevin L. Zacharoff, MD

PainWeek®

Disclosures

Nothing to Disclose

Learning Objectives

- Identify pain treatment-related regulatory agencies
- Discuss the changing role of regulatory agencies in today's pain management environment
- Review similarities and differences between regulatory approaches to prescribing practices
- Discuss the negotiation between regulatory forces and practical clinical aspects of managing patients with chronic pain

What is a Regulatory Agency?

▪ A regulatory agency is a public authority or government agency responsible for exercising some kind of autonomous authority over some area of human activity in a regulatory or supervisory capacity

– Also know as:

- Regulatory Authority
- Regulatory body
- Regulator

significant

Who Does What?

The Facts

- The Joint Commission
 - The Joint Commission **accredits and certifies nearly 21,000 health care organizations** and programs in the United States
 - Joint Commission accreditation and certification is recognized nationwide as a symbol of quality that reflects an organization's commitment to meeting certain performance standards

Painweek

Who Does What?

The Facts

- The National Committee for Quality Assurance (NCQA)
 - Helps to build consensus around important healthcare quality issues and to decide what's important, how to measure it, and how to promote improvement by working with:
 - Large employers
 - Policymakers
 - Healthcare providers
 - **Patients**
 - Health plans

Painweek

Who Does What?

The Facts

- The Office of National Drug Control Policy (ONDCP)
 - Works to **reduce drug use and its consequences** by leading and coordinating the development, implementation, and assessment of U.S. drug policy
 - In addition to its vital ongoing work, ONDCP also provides administrative and financial support to the **President's Commission on Combating Drug Addiction and the Opioid Crisis**

Painweek

Who Does What?

The Facts

- The Environmental Protection Agency (EPA)

- Mission is to protect human health and the environment
- Plays an integral role in U.S. policies concerning natural resources, human health, economic growth, energy, transportation, agriculture, industry, and international trade
- Ensuring that federal laws protecting human health and the environment are enforced fairly and effectively

PainWeek <http://www.painweek.com> Accessed July 13, 2017.

Who Does What?

The Facts

- The Drug Enforcement Administration (DEA)

- Enforces controlled substances laws and regulations as they pertain to the manufacture, distribution, and dispensing of legally produced controlled substances
- Brings criminal and civil justice actions against organizations and principal members of organizations, involved in the growing, manufacture, or distribution of controlled substances appearing in or destined for illicit traffic in the U.S.

PainWeek <http://www.painweek.com> Accessed July 13, 2017.

Who Does What?

The Facts

- The Federation of State Medical Boards (FSMB)
- Represents the **70 state medical and osteopathic regulatory boards** (state medical boards)

- Supports its member boards as they fulfill their mandate of protecting the public's health, safety and welfare through the proper **licensing, disciplining, and regulation** of physicians and, in most jurisdictions, other healthcare professionals

PainWeek <http://www.painweek.com> Accessed July 13, 2017.

Who Does What?

The Facts

• The Centers for Disease Control and Prevention (CDC)

- Main goal is to **protect public health and safety** through the **control and prevention of disease**, injury, and disability in the US and internationally
- Focuses mainly on infectious disease, food borne pathogens, environmental health, occupational safety and health, health promotion, injury prevention and educational activities designed to improve the health of United States citizens
- **Researches and provides information on non-infectious diseases** is a founding member of the International Association of National Public Health Institutes

PainWeek <http://www.painweek.com> Accessed July 13, 2017.

Who Does What?

The Facts

• The Food and Drug Administration (FDA)

- Responsible for **protecting the public health** by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices
- Ensures the safety of our nation's food supply, cosmetics, and products that emit radiation

The Implications

This is an important message from the Board delivered to your registered primary email address.

Dear Arizona Physicians:

On June 5, 2017, Governor Ducey declared a state of emergency in response to the state's opioid crisis. Governor Ducey issued Executive Order 2017-04, Enhanced Services, in response to the state's opioid crisis.

Attached please find a link to a letter from Cara Christ, M.D., M.S., Director of the Department of Health Services, informing the medical community of the new requirements related to reporting suspected opioid overdoses and deaths.

This is one of the first steps in gathering important data to assist in assessing the problem and devising strategies to combat this serious health epidemic.

Very truly yours,

Patricia McSorley, J.D.
Executive Director
Arizona Medical Board

The Implications

Governor Dukey Declares Statewide Health Emergency In Opioid Epidemic

June 5, 2017

News Release

Newly released data from the Arizona Department of Health Services shows in 2016, 790 Arizonans died from opioid overdoses — an average of more than two people per day. The trend shows an alarming increase of 74 percent over the past four years. Today's declaration by the governor directs the Arizona Department of Health Services to rapidly respond to this public health emergency.

- prevent prescription opioid drug abuse through appropriate prescribing practices,
- develop guidelines to educate healthcare providers on responsible prescribing practices,
- expand access to treatment, especially Medication Assisted Treatment (MAT), and
- reverse overdoses through the distribution of naloxone.

Healthcare Provider Registration for Prescription Opioid Assisted Emergency Opioid Injection. Accessed July 14, 2017.

So What?

The Implications

Dear Patients:

On June 5, 2017, Arizona Governor Doug Ducey declared a Public Health State of Emergency due to the opioid epidemic. The declaration directs Arizona Department of Health Services to lead the statewide emergency response.

As a result of A.D.H.S.'s declaration of a Public Health State of Emergency, the following actions will be implemented:

- Immediate registration within 24 hours of their license holder will go into effect for all prescribers.

Prescription Requirements	Registration	Prescribing System
Prescription requirements for Schedule II, III, and IV controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule I controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule V controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule VI controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule VII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule VIII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule IX controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule X controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XI controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XIII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XIV controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XV controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XVI controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XVII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XVIII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XIX controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XX controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXI controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXIII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXIV controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXV controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXVI controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXVII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXVIII controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXIX controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.
Prescription requirements for Schedule XXX controlled substances	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.	• Immediate registration within 24 hours of their license holder will go into effect for all prescribers.

NYS – PMP

The Implications

Internet System for Tracking Over-Prescribing

- Effective August 27th, 2013, most prescribers are required to consult the **Prescription Monitoring Program (PMP) Registry** when writing prescriptions for Schedule II, III, and IV controlled substances
- The registry provides practitioners with direct, secure access to view dispensed controlled substance prescription histories for their patients
- The PMP is available 24 hours a day/7 days a week via an application on the Health Commerce System (HCS) at <https://commerce.health.state.ny.us>
- Reports include all controlled substances that were dispensed in New York State and reported by the pharmacy/dispenser for the past six months
- This information allows practitioners to better evaluate their patients' treatment with controlled substances and determine whether there may be abuse or non-medical use

So What? **The Implications**

ELECTRONIC PRESCRIBING
Revised: November 2014

Q2: Is Electronic Prescribing mandatory for New York State practitioners?

A2: As of March 27, 2015, it will be mandatory for practitioners, including veterinarians, to issue electronic prescriptions for controlled and non-controlled substances. Electronic prescribing of controlled substances will require additional security features and registration of the certified software application with the Bureau of Narcotic Enforcement.

Mandatory Prescriber Education Guidance

Prescribers licensed under the title of the Education Law in New York to treat humans and who have a DEA registration number to prescribe controlled substances, as well as medical residents who prescribe controlled substances under a faculty DEA registration number, must complete at least three (3) hours of course work or training in pain management commencing on July 1, 2017. The course work or training must be completed July 1, 2017. An every three-year threshold, pursuant to Public Health Law § 2805(1)(c).

The course work or training may be live or online.

The course work or training must include the following eight (8) topics:

- New York State and federal requirements for prescribing controlled substances;
- Pain management;
- Appropriate prescribing;
- Managing acute pain;
- Prescribing medication;
- Assessment, monitoring and signs of addiction;
- Responses to abuse and addiction; and
- End of life care.

pennsylvania
DEPARTMENT OF HEALTH
PENNSYLVANIA DRUG MONITORING PROGRAM

In case you missed it – New PA PDMP requirements for prescribers.

New legislative changes to the Pennsylvania Prescription Drug Monitoring Program (PA PDMP) went into effect April 1, 2017.

Here is what you need to know:

- **Prescribers** must now query the PA PDMP **each time** a patient is prescribed an opioid drug product or non-controlled substance to the prescriber. There are exceptions for emergency departments and for patients who are admitted to a health care facility, and these can be found on our website's [Frequently Asked Questions](#) page.
- **Dispensing practitioners** must now submit data to the PA PDMP **no later than the close of the subsequent business day** (Monday through Friday) after dispensing the controlled substance, as opposed to the previous requirement of within 72 hours.

PainWeek

So What?

The Facts

Pennsylvania Prescription Drug Monitoring Program Now Sharing Data with 11 Other States and D.C.

The Pennsylvania Prescription Drug Monitoring Program (PA PDMP) has now connected with 11 other states in an effort to foster data sharing among PDMPs. Interstate sharing of data helps prescribers and pharmacists get a more complete picture of their patients' controlled substance prescription histories, regardless of which state they filled their prescription in.

Users of the PA PDMP can now see if their patients have filled controlled substance prescriptions in: Connecticut, Illinois, Louisiana, Massachusetts, New Jersey, New York, Ohio, Texas, Virginia, West Virginia, and Washington D.C. Additionally, a one-way sharing connection has been established with Maryland, enabling their program users to search the PA PDMP. The PA PDMP Office invites all other states to begin sharing data, and anticipates that Pennsylvania will connect with more state PDMPs in the upcoming weeks.

So What?

The Implications

The screenshot shows the Pennsylvania Department of Health's Opioid Prescribing Guidelines webpage. It includes a header with the state logo, a main title 'OPIOID PRESCRIBING GUIDELINES', and several sections of text and images. A map of Pennsylvania is visible in the top right corner of the screenshot.

January 5, 2017

Centers for Medicare & Medicaid Services (CMS)
Opioid Misuse Strategy

CENTERS FOR MEDICARE & MEDICAID SERVICES (CMS) OPIOID MISUSE STRATEGY 2016

CMS has made attacking this devastating epidemic a top priority and is providing help and resources to clinicians, beneficiaries, and families. This is an ongoing CMS strategy, as part of the HHS Opioid Initiative launched in March 2015, to combat misuse and promote programs that support treatment and recovery support services. The CMS effort includes four priority areas:

1. Implement more effective person-centered and population-based strategies to reduce the risk of opioid use disorders, overdoses, inappropriate prescribing, and drug diversion.
2. Expand naloxone use, distribution, and access, when clinically appropriate.
3. Expand screening, diagnosis, and treatment of opioid use disorders, with an emphasis on increasing access to medication-assisted treatment, and
4. Increase the use of evidence-based practices for acute and chronic pain management.

HHS, HHS News, 2016. HHS releases strategy to address opioid-drug related overdose, death and dependence. <https://www.hhs.gov/press/20160714-000001>. Accessed July 14, 2017.

The Role of Regulatory Agencies

The Facts

- Supporting the Department of Health and Human Services Initiative
 - Increasing the evidence base with **research and data**
 - Investing ~\$12 million over next 3 years to explore how to best support rural primary care practices using medication-assisted therapy and overcoming educational barriers

https://www.aahrq.gov/news-events/press-releases/2016/07/14/med-assisted-therapy-rural-primary-care Accessed July 14, 2017.

The Role of Regulatory Agencies

The Implications

SAFE USE OF OPIOIDS IN HOSPITALS

- Create and implement policies and procedures for the ongoing clinical monitoring of patients receiving opioid therapy
- Create and implement policies and procedures that allow for a second level review by a pain management specialist or pharmacist
- Track and analyze opioid-related incidents
- Use information technology to monitor prescribing
- Advise clinicians who prescribe pain medications to use both pharmacologic and non-pharmacologic alternatives
- Educate and assess the understanding of staff
- Educate and provide written instructions to patients on opioids
- Assess the organization's need for training based on the analysis of reported adverse events, near misses and staff observations

The Role of Regulatory Agencies

The Implications

- Proposes new measures to assess potentially inappropriate use of opioids:
 - Assesses whether health plan members 18 years and older receive:
 - Long-term opioids at high dose
 - Opioids from multiple prescribers or multiple pharmacies
 - Long-term, high-dose opioids from multiple prescribers and multiple pharmacies

The Role of Regulatory Agencies

The Facts

President's Commission on Combating Drug Addiction and the Opioid Crisis

- Mission
 - To study the scope and effectiveness of the Federal response to **drug addiction** and the **opioid crisis** and to make recommendations to the President for improving that response including
 - Availability of **addiction treatment** and **drug reversal**
 - Best practices for prevention including **education** and **PDMPs**

DEA Reduces Amount of Opioid Controlled Substances to be Manufactured in 2017

- The United States Drug Enforcement Administration (DEA) has reduced the amount of almost every Schedule II opiate and opioid medication that may be manufactured in the United States in 2017 by 25 percent or more
- The purpose of quotas are to provide for the adequate and uninterrupted supply for legitimate medical need of the types of schedule I and II controlled substances that have a potential for abuse, while limiting the amounts available to prevent diversion

The Role of Regulatory Agencies

The Facts

MODEL POLICY ON THE USE OF OPIOID ANALGESICS IN THE TREATMENT OF CHRONIC PAIN

Adopted as policy by the House of Delegates of the Federation of State Medical Boards in July 2013

- To provide state medical boards with an updated guideline for assessing physicians' management of pain
- To determine whether opioid analgesics are used in a manner that is both medically appropriate and in compliance with applicable state and federal laws and regulations

The Role of Regulatory Agencies

The Implications

- Consider treatment inappropriate including but *not limited to*:
 - Inadequate attention paid to **initial assessment and risk determination**
 - Inadequate monitoring** of potential for aberrant drug-related behaviors and use of available tools
 - Inadequate attention to **patient education and informed consent**
 - Unjustified **dose escalation**
 - Excessive reliance on opioid analgesics (particularly **high doses**)

The Role of Regulatory Agencies

The Implications

CDC Guideline for Prescribing Opioids for Chronic Pain — United States, 2016

The Role of Regulatory Agencies

The Implications

- Guidelines
 - **Non-pharmacologic** therapy and **non-opioid** pharmacologic therapy are preferred for chronic pain
 - Before starting opioid therapy for chronic pain, clinicians should **establish treatment goals** with all patients
 - Discuss known **risks, benefits, and responsibilities** with patients
 - **Immediate-release opioids** first

The Role of Regulatory Agencies

▪ Guidelines (Cont'd)

- Lowest effective dosage
 - Reassess risk/benefit if ≥ 50 MME/day
 - Avoid or carefully justify ≥ 90 MMD/day
- In acute pain, **lowest effective dose, lowest quantity**
- Re-evaluate risk/benefit** in 1-4 weeks, then every 3 months
- Utilize strategies that **mitigate risk**
 - Opioid risk assessment
 - Naloxone

The Role of Regulatory Agencies

▪ Guidelines (Cont'd)

- Check the **PDMP**
- Urine drug testing before initiation**
 - At least annually
- Avoid concurrent opioids and benzodiazepines
- Offer or arrange for evidence-based treatment for patients with opioid use disorder

The Role of Regulatory Agencies

Checklist for prescribing opioids for chronic pain

For prescribers who are not board certified or board eligible in addiction medicine

BEFORE PRESCRIBING

BEFORE PRESCRIBING, long-term opioid therapy

1. Do not start therapy for chronic pain based on diagnosis
2. Check state and federal databases for prior and current prescriptions
3. Discuss benefits and risks, long-term, addiction, overdose with patient
4. Complete risk assessment
5. Check state drug use monitoring program (SDMP) data
6. Get informed consent from patient
7. Assess baseline pain and function by PDQ scale
8. Identify other management options (e.g., surgery, acupuncture, physical therapy, cognitive behavioral therapy, etc.)
9. Offer or refer to evidence-based treatment for patients with opioid use disorder

BEFORE PRESCRIBING, initiate treatment plan

1. Check state drug use monitoring program (SDMP) data
2. Discuss risks and benefits, long-term, addiction, overdose with patient
3. Complete risk assessment
4. Check state drug use monitoring program (SDMP) data
5. Get informed consent from patient
6. Assess baseline pain and function by PDQ scale
7. Identify other management options (e.g., surgery, acupuncture, physical therapy, cognitive behavioral therapy, etc.)
8. Offer or refer to evidence-based treatment for patients with opioid use disorder

ash@hhs.gov

HHS recommends prescribing or co-prescribing naloxone to patients at high risk for an opioid overdose

Adm. Brett P. Giroir, MD, assistant secretary for health and senior advisor for opioid policy, today released [guidance](#) for healthcare providers and patients detailing how naloxone – the opioid overdose reversal drug – can help save lives and should be prescribed to all patients at risk for opioid complications, including overdose.

"Given the scope of the opioid crisis, it's critically important that healthcare providers and patients discuss the risks of opioids and how naloxone should be used in the event of an overdose," said Adm. Giroir. "We have begun to see some encouraging signs in our response to the opioid crisis, but we know that more work is required to fully reverse the decades-long epidemic. Co-prescribing naloxone when a patient is considered to be at high risk of an overdose is an essential element of our national effort to reduce overdose deaths and should be practiced widely."

The California Death Certificate Project

- Investigators are going back **three years to identify any doctors who may have prescribed the drugs inappropriately when someone dies of an overdose death**, even if it was not the fatal dose, and send them letters
- A physician in San Francisco was sent a letter explaining that a patient he had treated died in 2012 from taking a toxic cocktail of methadone and Benadryl — and he was the doctor who wrote the patient's last prescription for methadone
- He had **two weeks to respond to the letter** with a written summary of the care he had provided, and a certified copy of the patient's medical record facing fines of \$1,000 per day if he didn't comply
